

By examining abandoned RE power plants in Europe and South America, we will elaborate a typology of the reasons for abandonment, explore common patterns, and examine the regulatory ...

Sadly, this wasn't possible and a giant of the solar electricity production world has fallen. In more positive news out of the solar sector, researchers at Stanford University believe they've got ...

Like the vanished, money making dreams that spawned them, it can be hard to find abandoned solar and wind farms. The most impressive are in the United States, where investors ...

One million solar panels lie abandoned in the desert. Uncover the story behind America's lost renewable energy potential. Act now!

Researchers studying decommissioned wind and solar farms in Italy, Spain, Venezuela, and Argentina have found that weak regulations risk leaving more abandoned assets in their wake.

One of the most ambitious solar projects in history is quietly heading for shutdown after just a decade of operation. The Ivanpah Solar Power Facility in California's Mojave Desert was once...

Ivanpah's concentrated solar technology, which uses sunlight to heat a fluid and generate steam, never worked as well as expected. Meanwhile, solar photovoltaic panels that convert sunlight...

Renewable energy sources, such as solar, wind, and hydroelectric, offer exciting opportunities to transform abandoned power plants into clean energy hubs. The integration of these sites into the ...

When Ivanpah began operating in 2014, it ranked as the world's largest solar plant. It seemed like a viable solution to California's renewable energy goals of employing affordable and efficient...

What was once the largest solar power plant of its type in the world appears headed for closure just 11 years after opening.
