

Albania builds solar power generation system

Albania is advancing its renewable energy ambitions with a planned 50 MWp ground-mounted solar power plant in Belshi, central Albania. While initially slated for 2025, procurement ...

Albania's Ministry of Infrastructure and Energy has received four applications for solar projects with a total installed capacity of 235 MW. The projects are planned to be built in the ...

Five utility-scale solar photovoltaic parks with a combined installed capacity of 156 MW were commissioned in Albania in 2025. The largest of these, Sunny Side Solar (100 MW), was ...

The French renewable energy company Voltalia has announced plans to build new energy projects in Albania, including the Karavasta and Spitalla solar parks. These projects ...

A ceremony took place in Albania, 22 July 2025, to sign the agreement to build a new solar photovoltaic power plant at Belshi. The EUR42 million project is co-financed by an EU contribution ...

Solar power accounts for 6% of electricity production in Albania. More than half of the photovoltaic output is from the Karavasta facility, the biggest of its kind in the Western Balkans.

On May 6, 2025, the Albanian government approved the development of two new solar power plants, totaling 54 megawatts (MW) in capacity.

The Ministry of Infrastructure and Energy of Albania received four applications for solar power projects with a combined capacity of 235 MW. A proposed unit in Fier, the country's ...

Voltalia will build, operate and own the solar farm. The company also owns the 140-MW Karavasta solar farm in Albania, commissioned in December 2023.

Developed by Voltalia, the 140 MW solar park was commissioned at the end of 2023 and is expected to generate 265 GWh of electricity annually -- enough to power approximately 220,000 ...
