

Farmers, residents and businesses are developing rural initiatives in Armenia, with the support of AFD Group. They're working to develop rural areas via one project targeting housing, and ...

In this paper, a review of recent developments in rural electrification through micro-grids is presented. This work first lays the background on the challenges hindering the mass deployment of ...

This paper serves as a link between scientific advancements and field-proven best-practices for designing microgrids in rural communities.

This chapter presents different methods and tools for microgrid optimal investment and planning problem, focusing on specific methodological aspects addressing the challenges of rural ...

In particular, solar-powered microgrids, where solar energy is paired with battery storage, can provide power for rural communities while reducing energy insecurities and greenhouse gas ...

Over the past five years, Armenia's energy storage capacity has grown by 400%, reaching 150 MW in operational projects as of 2023. This surge aligns with the government's target to achieve 30% ...

Summary: Armenia's groundbreaking 8GWh energy storage project is set to revolutionize its power grid, enhance renewable energy integration, and stabilize electricity supply. This article explores the ...

This paper serves as a link between scientific advancements and field-proven best-practices for designing microgrids in rural ...

Several of these research activities are brought together with an emphasis on Solar Pico Systems under the Rural Electrification Research Group (RurERG) and assist in the development of solar home ...

Armenia's power sector is heavily dependent on imported fuels, especially natural gas, which creates significant energy security risks, compounded by the global energy crisis. Attracting ...

A new project worth 12.3 million euros to overcome energy challenges in rural communities has been launched in Armenia, the press service of the Ministry of Territorial ...
