

Boston Energy Storage Power Station Project

The 200-megawatt battery energy storage facility initiated a City of Boston Article 80 review. VHB is leading the review process for the project.

It is said to be instrumental in helping Massachusetts achieve approximately one-third of its energy storage target, which is the deployment of 1,000MWh of battery energy storage by 2025.

At 150 MW / 300 MWh, Cranberry Point is helping the Commonwealth reach roughly a third of its goal to deploy 1,000 MWh of battery energy storage by 2025.

The Project proposes installation of 169 BESS modules - consisting of lithium-ion batteries housed in above-ground storage cabinets and transformers on concrete slabs - on approximately 4.3 acres ...

It is spread across 6 acres and is connected to Eversource's Carver 115 kV substation. The Carver substation is an important link to a major north-south transmission line carrying power to many ...

Plus Power announced it is now operating its Cranberry Point Energy Storage facility in Carver, Massachusetts, the largest utility-scale standalone battery energy storage system on New England's grid.

Massachusetts is making a big push for batteries -- not the kind you put in a flashlight, but powerful, tractor trailer-sized batteries that store energy for the electric grid. State officials say...

As outlined in the recent presentation for the local community, Flatiron is proposing to construct a 168MW BESS, known as Salt Cod Storage, at the former coal-fired Montaup Power Plant located along the ...

Flatiron Energy proposes 672MWh BESS at former Massachusetts fossil plant, pauses indoor BESS project in Boston. Flatiron Energy has commenced initial proceedings to construct a ...
