

# Carpenter changes career to install photovoltaic panels

How many jobs does a solar photovoltaic installer have?

Depending on the job and state laws, PV installers may connect the solar panels to the electrical grid, although electricians sometimes do this task. Solar photovoltaic installers held about 17,100 jobs in 2021. The largest employers of solar photovoltaic installers were as follows:

How do I become a solar photovoltaic installer?

There are multiple paths to becoming a solar photovoltaic (PV) installer, or PV installer. These workers typically need a high school diploma, but some take courses at a technical school or community college; they also receive on-the-job training lasting up to 1 year. Some PV installers learn to install panels as part of an apprenticeship.

Can a qualified electrician fit solar panels to a building?

If you're a qualified electrician you could take a short training course in the installation and maintenance of small solar photovoltaic (PV) systems. This would allow you to fit solar panels and connect them to a building's electrical mains network. You could take solar PV training to fit solar panels to buildings if you're a qualified roofer.

What does a solar photovoltaic installer do?

Solar photovoltaic (PV) installers, also known as PV installers, assemble, set up, and maintain rooftop or other systems that convert sunlight into energy. PV installers typically do the following: At the jobsite, PV installers verify the measurements and design of the structure on which the PV system is being set up.
