

Solar thermal-electric power systems collect and concentrate sunlight to produce the high temperatures needed to generate electricity. All solar thermal power systems have solar energy ...

Adjective concentrated (comparative more concentrated, superlative most concentrated) Not dilute; having a high concentration.

to (cause to) become more intense, as by removing or reducing the amount of liquid: [no object] The gravy thickened and concentrated in the microwave. [~ + object] Concentrate the gravy by ...

Most of the country's population is concentrated in the north. In the dry season, the animals tend to concentrate in the areas where there is water.

Concentrated solar power plants With a daily start-up and shut-down high demands are placed on CSP-plants. Our power generation equipment and instrumentations and controls enable plant operators to ...

As a thermal energy generating power station, CSP has more in common with thermal power stations such as coal, gas, or geothermal.

The meaning of CONCENTRATED is rich in respect to a particular or essential element : made less dilute or diffuse. How to use concentrated in a sentence.

What Are Key Elements of Concentrated Solar Power Plants? Concentrated Solar Power (CSP) plants comprise several key elements, including advanced solar concentrating technologies, robust thermal ...

Learn how thermal fluids like molten salt power CSP plants, store heat, and improve heat exchanger efficiency for reliable clean energy.

This chapter explains the main features of CSTP plants (different technologies currently available and their main components) as well as the benefits and drawbacks of these systems when compared to ...

When you finally clean your bedroom, you'll have to pick up the clothes that are scattered everywhere so they're concentrated in the closet. Concentrated can also mean that something ...

High-temperature solar thermal systems primarily rely on concentrated solar power (CSP) technologies, including parabolic trough collectors, solar power towers, and Fresnel lens collectors, ...

CONCENTRATED definition: applied with all one's attention, energy, etc.. See examples of concentrated

used in a sentence.

Concentrating solar-thermal power (CSP) systems have many components that help convert sunlight into usable energy. In CSP plants, mirrors reflect and concentrate sunlight onto a focused point or ...

A concentrated liquid has been increased in strength by having water removed from it. Sweeten dishes sparingly with honey, or concentrated apple or pear juice.

Concentrating solar technologies can be used to generate electricity and process heat from sunlight, with the capability to store energy for use at night or when insolation is low.
