

Gas engine containers are used for a wide variety of applications and can be single or dual fuel units. The containers can be equipped for heat recovery, emissions reduction, absorption chilling, heat ...

ELCOS offers the possibility of installing power generators inside CONTAINERS Iso Range 20/20HC" - 30/30HC" - 40/40 HC" according to the customer's requirements. All the CONTAINERS can be ...

We offers containerized generator sets with CHP and Emission control system. With our genset containers offer optimal performance in various site conditions.

Centum™ Force, a Cummins Power Generation containerized generator sets range, provide significantly shortened installation and commissioning time. The stackable design allows for a smaller ...

Simply put, dual packs are two parallel generators in one ISO container: Two 500 kW generators could be paralleled to achieve a 1000 kW output, or two 625 kW generators to achieve 1250 kW. This dual ...

Jenbacher offers containerized generator sets based on our Type 2, 3, 4, and 6 gas engines. Leveraging the expertise acquired during several decades with more than 3,000 containerized units delivered, ...

Our factory-packaged containerized generator sets are designed to address these challenges comprehensively. They offer a reduced footprint, improved ease of transportation and significantly ...

MITTRONIK Engineering is specialised in customized solutions. The container generators are fully operational supplied, including air-intake, exhaust system and silenced muffler, tank, control panel ...

Heavy-duty dual stage fuel and air filtration are included as standard, for longer up-time and extended service intervals. The QEC comes in a standard ISO CSC container for easy transportation to the ...

X2 Energy offers the containerized dual fuel engine technology. This technological breakthrough allows customers the flexibility to operate the engines using gas or liquid fuel such as diesel, biodiesel, and ...
