

Data Center Rack AC DC Integrated Turnkey Project

APEX's Micro DC solution is an integrated data center solution that incorporates Racks, UPS, Cooling, Fire Suppression, PDU and Environmental Monitoring System (EMS) in a compact single platform.

This compact, fully functional high-density data center enables you to more easily deploy a complete, remote or temporary data center solution at virtually any location around the world.

The first embodiment of this work is an AC-to-DC sidecar power rack that disaggregates power components from the IT rack. This solution improves the end-to-end efficiency by ~ 3% while...

Our all-in-one IT modular solutions seamlessly combine power, thermal management, and other solutions required, all of which are pre-integrated, and factory tested off-site, significantly reducing ...

From system builds, to fully functional, tested turnkey systems (using Celestica or third-party platforms), we can manage all stages of your project.

Our quality-controlled construction process and turnkey solutions ensure a completely integrated design to meet site-specific needs. Fully contained modular data center in a box with scalable infrastructure ...

We provide comprehensive, turnkey solutions for all data center asset upgrade and lifecycle projects. Our project methodology, shaped by our operational mindset, ensures that we maintain business ...

In this paper, we analyze a few examples of converters and topologies which will fit in the new architecture, as well as the technologies and components that enable them.

Schneider Electric's new line of solutions equips customers with integrated, data-validated, and easily scaled white space solutions that address new challenges in pod and rack ...

We will assist you in determining the type of design suited to your requirements and operational, security, density, service quality and energy efficiency stipulations. We will then support you ...
