

Detailed parameters of Trina photovoltaic monocrystalline panels

Based on the 210mm large-size silicon wafer and monocrystalline PERC cell, power output can exceed 550W.

The parameters of the solar panel determine the power generation of the system. Select the appropriate layout and achieve the maximum power generation through parallel and series ...

Trina Solar 415W is a monocrystalline module with a 20.4% efficiency, which is a long stretch ahead of what conventional panels have to offer. Trina Solar 415W has a low temperature ...

Compare Trina Solar panel specs, datasheets, and warranties to choose the best model for your home or business and make smart buying decisions.

With local presence around the globe, Trina Solar is able to provide exceptional service to each customer in each market and deliver our innovative, reliable products with the backing of Trina as a ...

STC: Irradiance 1000W/m², Cell Temperature 25°C, Air Mass AM1.5. NOCT: Irradiance at 800W/m², Ambient Temperature 20°C, Wind Speed 1m/s. *Measuring tolerance: ±3%. Power Bifaciality:±5%. ...

Specifications included in this datasheet are subject to change without notice. Version number: TSM_EN_2021_A

It details the product name and power range, maximum power output and tolerance, efficiency rating, and highlights high customer value, power, reliability, and energy yield. Dimensional drawings and I ...

High customer value Lower I-COE (Levelized Cost Of Energy), reduced BCS (Balance Of System) cost, shorter payback time Lower guaranteed firstyear and annual degradation Designed for compatibility ...
