

Flat deserts, wide-open spaces, and seldom a cloud in sight--the inner American West has all the makings for generating renewable power. And despite a slow start, the region's wind and solar...

The West Census Region, where 8.9% of single-family homes (2020 data) had small-scale solar generation, had the highest percentage of homes with small-scale solar generation, mostly in California.

Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that generate the highest percentage of their electricity from solar power.

Since 2021, more solar capacity has come online than any other energy source, particularly from 2023 to 2024. New natural gas capacity significantly decreased in the past year, while the amount of wind brought online ...

A new roadmap released Wednesday by the Biden administration spells out a plan to bring a significant amount of solar resources to the West to meet his goal of a 100% clean energy grid by 2030.

WASHINGTON -- The Department of the Interior today announced an updated roadmap for solar energy development across the West, designed to expand solar energy production in more Western states ...

Solar energy development has been concentrated in the Atlantic and West regions of the United States, especially in California, North Carolina, and Massachusetts. These States are among those with ...

The West boasts some of the most promising solar energy resources due to its geographical and climatic attributes. California leads the way with its vast desert landscapes and robust infrastructure.

Data and analysis including a list of solar power in every country in ...

Since the United States pioneered solar thermal power technology in the 1980s with Solar One, several more such power stations have been built.

California leads as the top solar state. With over 54 GW of solar installed, enough energy to power over 15 million homes. Texas has the fastest growing solar economy with the largest utility-scale solar and energy ...
