

Construction has started on the first major solar-plus-storage project in the Dominican Republic, which features a 24.8MW/99MWh battery energy storage system (BESS).

The call, by the Unified Council of Distribution Companies (CUED), will be the first in the nation to require projects to include batteries with storage capacity of at least four hours. The aim is to provide ...

The project aims to provide technical assistance to the MEM to enhance the integration of energy storage systems into renewable energy applications in rural electrifications, particularly solar photovoltaics.

New regulations in the Dominican Republic require 50% energy storage for renewable energy projects with capacities between 20 and 200 MW, but the lack of a clear critical service compensation ...

Akuo ambitions to further contribute to the energy transition within Dominican Republic with the development of additional projects, many of which will incorporate storage technologies. With 22 individuals, our local team ...

The solicitation specifically seeks to contract new wind and solar photovoltaic generation bundled with storage systems, with project capacities ranging from 20 MW to 300 MW, to reach the 600 MW total.

Located in the northern municipality of Nagua, the Payita 2 solar park will be paired with a 4-hour duration 15MW/60MWh battery energy storage system (BESS). The project will be located in the...

A notable achievement is the upcoming launch of the first four-hour energy storage system linked to a solar project, set to be operational by mid-2025. This system will participate in the spot market without ...

USTDA's grant will help create enabling regulations for battery energy storage systems to maintain the stability of the country's power grid as new wind and solar power plants are built. ...

Guided by an ambitious goal to reach 300 MW of energy storage capacity by 2027, the nation is working to enhance grid stability and reliability, paving the way for a cleaner energy system. Energy storage ...
