

Can You charge an electric car at home?

If you're able to charge an electric car (or plug-in hybrid) at home, you'll benefit from having the most convenient and cheapest way to charge your vehicle. Charging at home works out much cheaper than filling up a traditional petrol or diesel car. It's also more convenient and usually much cheaper than using public chargers.

How do I charge my eV at home?

When it comes to charging your EV at home, you can either charge through a 3-pin plug (though we don't recommend this long-term) or with a wall box charger. These professionally installed chargers can offer smart charging, cheaper EV tariffs, and can charge your EV overnight. But which one's best for you? Which home charger is best for me?

How much does a home EV charger cost?

Suitability: whether your home's electric supply can cope with an EV charger. How much does an EV charger cost? Government grants for EV chargers have all but disappeared, meaning it now typically costs between £450 and £1,200 to buy and install a home EV charger. The difference in cost is largely down to the amount of power it can supply.

How much does it cost to charge an electric car?

Some wallboxes also come with the option of a longer cable, which adds to the cost. For most, 7kW chargers are a good choice and cost around £800 to buy and install.
