

This is the Energy Report Card (ERC) for 2023 for Haiti. The ERC also includes sectoral data and information on policies and regulations; workforce; training and capacity building; and related areas.

As Haiti's National Energy Sector Regulatory Authority (ANARSE), our mission is to ensure reliable, cost-effective, and equitable electricity access for all Haitians.

Here's an overview of Energy Law in Haiti, including its legal framework, regulatory bodies, and sector context: Haiti's energy sector faces significant challenges, including limited ...

Haiti has experienced over 20 changes in government since 1988, disrupting long-term planning and implementation in the electricity sector and leading to extensive delays in updating national energy ...

Some towns in Haiti, such as Fort-Liberté, the capital of Nord-Est, have an electricity distribution network, but have been effectively abandoned by the national utility EdH for about a decade.

About one-quarter of the population in Haiti has access to electricity. The national power utility, Electricité d'Haïti (EdH), operates one power transmission and distribution grid that serves the Port ...

This leaves the country vulnerable to global oil price fluctuations, which directly impact the cost of electricity. Haiti also faces challenges in terms of lack of grid access, reliability of electricity service, ...

In spite of the development of legislation to better define the institutional framework (developed in 2002 but never filed), and support efforts to reduce fraud (filed in 2005, still under discussion in the ...
