

Ekü Energy is accelerating the deployment of battery assets in Australia by combining deep global expertise in financial and energy markets with our established specialist local business to deliver ...

In brief: The ACT Government is building a big battery in Williamsdale. Construction has begun, in partnership with Ekü Energy. This project is part of larger efforts to make Canberra a ...

Ekü Energy has finalized financing for its 250 MW/500 MWh energy storage system in Canberra, contributing to the energy security of the ACT and its ambitious climate goals.

The battery joins similar batteries in Dickson and Fadden, forming a growing network of neighbourhood-scale energy storage solutions across the ACT.

Over the next year, three new community-scale battery energy storage systems (BESS) will be deployed across Canberra to optimize solar energy usage, stabilize grid demand, and ...

Explore Canberra's bold microgrid and solar battery push -- community and grid-scale storage, peak demand reduction and renewable energy solutions with expert solar support.

Energy Storage is critical for ACT's 100% renewables and net-zero target. Helps to put downward pressure on electricity price paid by ACT consumers. Reduces the need for electricity network ...

With ambitious climate targets - including 100% renewable electricity by 2025 - the Australian Capital Territory (ACT) relies on cutting-edge storage systems to stabilize its grid. Let's explore how these ...

The large-scale 250 megawatts (MW) battery will store enough renewable energy to power one-third of the city of Canberra for two hours during peak demand, helping to provide long ...

Discover how the Canberra Compressed Air Energy Storage Project is reshaping sustainable energy solutions and why it matters for industries worldwide.
