

EASE is actively shaping the legal and R& D funding framework for energy storage at EU level. Members gain direct influence in the European decision-making process.

Maxxen develops advanced battery storage solutions to enhance energy sustainability and efficiency. The firm offerings include energy storage containers, cabinets, and systems integrated with ...

In order to deploy renewables and to release their potential for ensuring a stable and secure energy supply, Europe needs to work to overcome the intrinsic limits of renewables. One solution to these ...

A resilient and cost-efficient energy system requires both centralised and decentralised flexibility, making the reactivation of residential and commercial storage a priority. This edition of the ...

TESVOLT produces battery storage systems based on lithium batteries that can be connected to all renewable energies: sun, wind, water, biogas and thermal power.

Acquired a portfolio of five Italian battery energy storage systems (BESS) - with a total capacity of nearly 3.8GWh - from solar developer Emeren Group last year.

FTMRS SOLAR specializes in photovoltaic power generation, solar energy systems, lithium battery storage, photovoltaic containers, BESS systems, commercial storage, industrial storage, PV ...

Discover how European lithium battery technologies are reshaping energy storage markets and why they dominate global sustainability agendas.

Our battery storage projects are primarily co-located, meaning a regular renewable energy park is combined with batteries on the same plot, sharing the same grid connection. We currently have ...

Huijue Group's Home Energy Storage Solution integrates advanced lithium battery technology with solar systems. Ranging from 5kWh to 20kWh, it caters to households of varying sizes.
