

SOPHIA is an EU-funded Horizon Europe project that aims to implement advanced digital solutions in end-of-life solar panels, involving the full value chain in order to increase their current ...

This study provides a comprehensive analysis of photovoltaic (PV) panel waste management, examining both technical aspects and legislative frameworks, particularly focusing on ...

In 2022, European countries collected almost 50,000 tonnes of PV module waste from 18 countries, up significantly from previous years. Italy led with 21,500 tonnes collected, followed by...

EU manufacturers of solar panels are swiftly going out of business, as cheaper Chinese imports outcompete them. The European solar industry is collapsing despite the EU's energy ...

The EU Waste of Electrical and Electronic Equipment (WEEE) Directive entails all producers supplying PV panels to the EU market to finance the costs of collecting and recycling EOL ...

Europe is steadily expanding its solar panel recycling infrastructure, with several dedicated facilities already operational across the continent. France, Germany, and Belgium are leading the ...

EU manufacturers of solar panels are swiftly going out of business, ...

Waste from solar photovoltaic (PV) panels will be collected, treated ...

In this blog article, we introduce the directive on Waste of Electrical and Electronic Equipment (WEEE), which includes regulation of PV waste in Europe. We discuss why the WEEE directive is important, ...

It all started in 2012 with the entry into force of the 2005 revision of the directive, which brought photovoltaic panels within the scope of EU rules on the disposal of waste electrical and ...

The European Union is set to produce up to 35 million tonnes of photovoltaic waste by 2050, linked to rapidly increasing solar panel use. Researchers modelled how this waste can be ...

Waste from solar photovoltaic (PV) panels will be collected, treated and recovered at the expense of manufacturers, following a vote by energy ministers meeting in Brussels today (4 March).
