

Georgia Power has applied for certification of four battery energy storage sites totaling 500 MW expected to come online in 2026.

Georgia Power announced today that it has started construction on a battery energy storage system in Twiggs County, southeast of Macon, Ga.

Georgia Power recently announced that construction is underway for four new battery energy storage systems in strategic counties across the state to support energy capacity needs.

Georgia Power helps de-risk projects by locating BESS storage next to existing substations or retired plants. This is an intentional strategy to capitalise on existing infrastructure, ...

Discover how Georgia's innovative energy storage initiatives are reshaping renewable energy integration and grid stability. This comprehensive guide explores cutting-edge technologies, market trends, and ...

The state has quietly become a hotspot for energy storage companies, blending Southern ingenuity with cutting-edge tech. Let's unpack why Georgia's storage scene matters--for businesses, ...

Yes, Georgia has set specific targets for energy storage deployment through the Georgia Energy Storage Initiative (GESI). The state aims to deploy 1,200 megawatts (MW) of energy storage by 2024.

To rid the use of fossil fuels and meet its decarbonizing energy goals, Georgia Power is adding Battery Energy Storage Systems (BESS) to its clean energy portfolio. BESS creates more...

These storage options include batteries, thermal, mechanical, and more.

Georgia Power has requested certification from the Georgia Public Service Commission (PSC) for 9,900MW of new generation resources, including more than 3GW of battery storage that ...
