

# High-pressure solar-powered containerized drilling site in Tbilisi

Our gyrotron-powered drilling platform vaporizes boreholes through rock and provides access to deep geothermal heat without complex downhole equipment. Based on breakthrough fusion research and ...

As the demand for sustainable energy solutions grows, solar drilling is poised to play a crucial role in shaping a greener and more sustainable future. If you're looking to harness the ...

An important step in the energy supply for many years to come. By reducing the carbon intensity of its operations, Maersk Drilling aims to contribute to extracting these natural resources in a responsible ...

Herrenknecht HDD Rigs can be employed in any terrain. With horizontal directional drilling rigs from Herrenknecht, pipelines and protective pipes can be installed under rivers and infrastructures quickly, ...

An Off Grid solar Container unit can be used in a host of applications including agriculture, mining, tourism, remote islands, widespread lighting, telecoms and rural medical centres.

Traditionally powered solely by diesel generators, this rig was the site of a 5-month pilot project testing the viability of a containerized mobile solar hybrid integrated system in high-demand ...

Modular design makes it easy to increase the number of units according to capacity. That's why Containerised Compact Package Wastewater Treatment Units solutions are the best choice for a low ...

This guide provides an overview of offshore oil and gas drilling, including its process, ideal locations, necessity, environmental impact, and potential solutions to reduce its impact while still ...

Power: Equipped with batteries sized to provide a minimum of 7 days of power without solar charging, it is designed to deliver functionality in remote areas with limited infrastructure.

Case Study: In the Romanian mining project, the MEOX system achieved 100% solar-powered operation on sunny days, reducing fuel costs by 60% while significantly lowering carbon emissions ...
