

How about LONGi anti-dust photovoltaic panels

Anti-dust innovation for solar panels would not only boost base-line PV system performance, but also reduce the frequency of module cleaning, saving on O& M costs.

Chinese solar PV manufacturer LONGi has launched a new version of its Hi-MO X10 solar module with improved field performance attributes, based on its proprietary Hybrid Passivated Back Contact (HPBC) ...

Longi has launched its Hi-MO X10 anti-dust solar panel at the China (Jinan) International Solar Energy Utilization Conference. The new module series uses Longi's second-generation...

In addition to the core function of "preventing dust accumulation," the Hi-MO X10 anti-dust modules can also effectively prevent shadow shading and eliminate the risk of fire caused by local overheating due to ...

It walks through dust accumulation and its impact on PV performance. It also looks at a few key dust accumulation scenarios and details how LONGi's design combats them.

Combining LONGi's advanced HPBC back contact technology with the new TaiRay cells, the Hi-MO X6 Max Guardian Anti-Dust Solar Panels are designed to stay clean and deliver optimal performance, even in regions ...

Chinese solar PV solutions giant Longi has unveiled its Hi-MO X10 anti-dust solar panel at the Jinan International Solar Energy Utilization Conference.

Utilizing BC-cell technology and advanced anti-dust frame design, this module is optimized to minimize dust accumulation and improve overall power generation, ensuring higher energy yields over the lifetime of the ...

LONGi, a China-based PV module manufacturer, has unveiled its Hi-MO X10 Anti-Dust Pro module during its participation at the World Future Energy Summit (WFES) 2026 in Abu Dhabi. The product ...

All praise to LONGi's industry transforming move of adopting Back Contact Technology in it's product range, LONGi's newly developed anti-dust panels represent a significant advancement in addressing ...
