This is an open platform for Huawei. HUAWEI has 109 repositories available. Follow their code on GitHub.

Considering white cases are easy to find, and most components are black, this should be pretty common. You can search through PCPP's complete builds, I'm sure you can find on in there.

Recently, iFixit, a foreign dismantling agency, and its partner TechSearch International, disassembled the Pura 70 Pro and analyzed the relevant components on its motherboard.
