How to install a solar power system?

When you install your Solar Power system, try to position your photovoltaic panels directly under the noontime sun for maximum efficiency from your photovoltaic unit. Before Installation, take care of any obstructions to sunlight. Remove all unnecessary obstructions and items such as branches that may block sunlight to your solar unit.

Where should a solar panel be installed?

It is very important to install your solar panel at location that gets the most direct sun exposure. Solar Panels perform at optimum capacity when placed in direct sunlight. When you install your Solar Power system, try to position your photovoltaic panels directly under the noontime sun for maximum efficiency from your photovoltaic unit.

What is a solar panel mount?

Solar Panel Mounts are used to install photovoltaic panels. These mounts are available in 3 main types: Flush mounts. With the help of these mounts, you can install your solar panel onto an RV, on rooftop or against the side of a pole, on your roof. You can even install them as a free-standing unit.
