

Solar Energy Corporation of India Limited (SECI) is a Schedule-A CPSE under the Ministry of New and Renewable Energy (MNRE) for implementation of schemes and development of ...

Launched in March 2019, the PM-KUSUM Scheme supports farmers by offering financial assistance for installing solar-powered irrigation systems, including solar pumps and grid-connected solar power ...

ENGIE has been awarded its first hybrid project in India, combining 200 MW of solar PV with 100 MW / 600 MWh of battery storage. This project will enable the storage and supply of up to 6 ...

Guided by our National Electricity Plan and bold climate pledges, we aim to achieve 500 GW of renewable energy capacity by 2030--a goal that reflects our resolve to lead globally in clean energy. ...

This innovative project, supported by the World Bank and Climate Investment Fund, enables the storage of solar energy generated during the day for use during peak evening demand, marking a first for India on such a large scale.

Dramatic cost reductions over the last decade for wind, solar, and battery storage technologies position India to leapfrog to a more flexible, robust, and sustainable power system for delivering affordable ...

The paper spelt out that concentrated solar power (CSP) plant can deliver power on demand, making it an attractive renewable energy storage technology, and concluded that various measures would be ...

NLC India Renewables: Project includes 300 MW / 1,800 MWh energy storage; power supply locked in for 25 years.

Monitoring the status and preparation of reports of all the RE projects including Energy Storage projects (excluding Pump Storage Projects (PSPs)). Monitoring of state/ UT wise generation from Renewable ...

India's Ministry of Power (MoP) has issued a significant regulatory update requiring all new solar photovoltaic (PV) power tender projects to be equipped with at least 2 hours of co-located ...
