

Should you invest in solar-powered arena lights?

Investing in the best solar lighting for your needs will make life easier throughout winter. These systems are environmentally friendly, easy to install, and free to operate. Solar-powered arena lights are an ideal solution for exercising your horse during the winter, ensuring your training continues even when you can't ride within daylight hours.

How far away can a solar panel be used?

The solar panel can be mounted up to 5m away, and it is suitable for indoor and outdoor use. This light is perfect for use in a barn or stable yard. It could be used in an arena, but there are other options available with built-in solar panels that are less bulky. Reasons to buy Reasons to avoid

Are solar lights safe?

Whether you're trying to reduce your carbon footprint, cut down your electricity bill or don't have access to mains power, solar lighting is a reliable and safe option. These lights generally require very little wiring and are virtually maintenance free as most of the lighting components have a long lifespan.

Are solar lights a good option for your Arena?

These look great if you have a tight budget but looking for bright lights for your arena. Solar power is a greener alternative to traditional lighting. Whether you're trying to reduce your carbon footprint, cut down your electricity bill or don't have access to mains power, solar lighting is a reliable and safe option.
