

The expansion of the Halutziot solar project is a significant milestone for Israel's renewable energy sector. The addition of 87 MWp of solar capacity and an integrated battery storage ...

Discover how GSL Energy's high-voltage rack-mounted energy storage system and DEYE inverter are powering Israel's energy transition. With a modular design, intelligent temperature ...

The Faran solar and storage project (est. 2024) combines 21 MW of capacity and 50 MWh of storage to supply reliable renewable energy.

An IDF base in southern Israel has begun implanting the operation of "InfraBox," an off-grid infrastructure system combining solar panels, energy storage and smart microgrid technology.

Project Overview BESS for PV Self-Consumption in Israel demonstrates how a 125kW/261kWh cabinet battery energy storage system can boost the economic return of an existing rooftop PV system. ...

Azrieli Group partners with Shikun & Binui for a groundbreaking solar-plus-storage project, advancing Israel's renewable goals and securing clean energy for 20 years.

"This project supports Israel's 2030 energy storage targets and demonstrates how smart engineering and scalable technology drive long-term energy resilience and grid independence.

A Tel Aviv apartment building has become the first in the country to sign a contract for a solar energy storage battery that will enable it to go off grid and maintain electricity in common areas ...

The inclusion of storage is intended to improve flexibility in power supply from the solar plant. Once completed, renewable energy projects located in the Ashalim area are expected to ...

Here's the kicker: photovoltaic (PV) plants without storage can't solve the "sunset problem" - when energy production plummets exactly when demand peaks. That's where Israel's new generation of ...
