

Malta's regulations on wind and solar complementary construction of communication base stations

Does Malta have an offshore wind project?

Malta has also taken important steps to explore offshore renewable energy potential. While no offshore wind projects have yet been commissioned, consultations and preparatory tenders have generated interest from international stakeholders.

What is the Energy Performance Certificate (EPC) in Malta?

The Energy Performance Certificate (EPC) in Malta is a document that assesses the energy efficiency of buildings. Introduced under the Energy Performance of Buildings Regulations, 2008, the EPC provides a rating for buildings based on their energy consumption and carbon emissions.

What makes Malta a greener country?

Backed by legally binding targets, a clear regulatory structure, and support schemes for both households and businesses, Malta's energy transition is shaped by the country's obligations under EU law and its own National Energy and Climate Plan (NECP). Malta's path toward a greener future is firmly rooted in its commitment to renewable energy.

How do incentive schemes work in Malta?

Incentive schemes offered through Malta Enterprise and the Regulator for Energy and Water Services (REWS), which aim to encourage investment and adoption. These legal instruments support Malta's obligations under the EU Green Deal and the National Energy and Climate Plan, setting ambitious but achievable goals for the years ahead.
