

Elon Musk is bringing the same revolutionary thinking that helped him upend the car industry to the data center business with promises this week to put up to a million new satellites in ...

After recently making headlines for his comments on womanhood, Elon Musk has once again stirred the internet, this time with a blunt take on the future of clean energy. The Tesla and ...

Facing an AI-driven energy crunch, Elon Musk is eyeing a U.S. Solar Gigafactory. This would complete Tesla's energy ecosystem of Solar, Powerwall, and Megapack.

"The solar opportunity is underestimated," Musk said, adding that Tesla sees solar and storage--on Earth and eventually in space--as core pillars of future energy abundance. Tesla is no ...

"By directly harnessing near-constant solar power with little operating or maintenance cost, these satellites will achieve transformative cost and energy efficiency," the filing stated. What Comes ...

In this article, we will delve into Musk's vision for solar energy, the significance of the Kardashev scale, and the challenges that lie ahead in realizing this ambitious dream.

Musk says solar powered and space-based data centres are the only way to meet AI's burgeoning energy demands.

Taking to the social media platform X on Sunday, Musk shared that the Sun was an "enormous, free fusion reactor" whose energy can be harnessed to meet the planet's power ...

In a recent interview, Elon Musk says that solar is the only logical energy source to build out, and it logically dwarfs all other sources.

Elon Musk's vision of a sun-powered future involves harnessing solar energy on a grand scale. This article explores the feasibility of this vision, examining Tesla's contributions, potential ...
