

A 5 kW hybrid solar-powered air conditioning system is proposed to meet a building's cooling needs. Integration of salt hydrate-based phase change materials (PCM) with boron nitride ...

The solar air conditioner is actually a solar thermal system that uses a solar thermal panel to drive the refrigerant in the system and this makes it about 70% more efficient than the standard air conditioner.

The adoption of solar energy in Myanmar is rising due to increasing oil prices and electricity costs, along with greater market accessibility of solar products.

Fortis Myanmar Technology provides holistic support, guiding clients from the initial consultation to installation and ongoing maintenance. Our engineers are dedicated to optimizing your solar energy ...

PAC Hybrid Solar is a versatile, energy-saving, Multi-VRF solar inverter that uses the energy from the sun through solar cells. The electricity produced by the solar panel (DC power) is directly connected ...

Propane (R290) is a potential drop-in alternative for R134a as a natural refrigerant. Residential air-conditioning units are essential for providing suitable interior comfort in regions ...

Challenged to create air conditioning systems that provide exemplary performance in the wide-ranging climatic conditions found throughout Japan, our engineers develop amazingly sophisticated yet ...

For the past seven months, his home has been fully powered by solar energy, from lighting to air-conditioning. He first learned about solar products a year ago and frequent power cuts ...

As climate concerns grow, understanding the evolution, mechanics, and challenges of solar A/C systems is vital for adopting sustainable cooling solutions. Discover case studies ...

This study aims to evaluate the impact of air-conditioning on both the technical performance and economic viability of solar inverters in rooftop photovoltaic (PV) systems under ...
