

Take Nepal's first solar-storage PPA signed last week - a 25-year deal guaranteeing 14% IRR through monsoon/winter price arbitrage. As Asian Development Bank's energy lead Priya Singh puts it: ...

Nepal has only two storage projects--Kulekhani I (60 MW) and Kulekhani II (32 MW). The project, which will be Nepal's third storage type, is 150 km west of Kathmandu on the Seti river ...

This pioneering project is set to transform industrial energy use by replacing polluting diesel generators with a large-scale battery storage system powered by solar energy.

This article explores the country's progress, challenges, and innovative solutions like solar-storage hybrids and microgrids. Learn how these projects are reshaping Nepal's energy landscape and ...

Representing Nepal at the launch were Nepali Ambassador Bharat Kumar Regmi, Gham Power CEO Anjal Niraula, and teams from Swanbarton and Practical Action. This groundbreaking ...

In such a volatile climate, relying almost entirely on hydropower is a sheer stupidity. Nepal's energy future lies not in hydropower alone, but in a combination of hydro, solar and storage.

The findings provide valuable insights for policymakers to shape future energy strategy and guide investment priorities under low, medium, and high demand growth scenarios offering a ...

This report was prepared by the National Renewable Energy Laboratory (NREL) with support from the U.S. Department of State to inform a broader dialogue around the future direction of Nepal's ...

Nepal needs to build storage projects for energy security and stability and also for meeting its generation targets. This would require collaboration between the private and public sectors.
