

Here are ten notable innovations taking place across different energy storage segments, as highlighted in GlobalData's Emerging Energy Storage Technologies report.

State-owned energy company Synergy has completed the 500MW/2,400MWh Collie Battery Energy Storage System (CBESS) in Western Australia, establishing Collie as home to Australia's largest ...

UK energy storage company Zenobe has decided to enter the German market and is looking to acquire battery energy storage systems (BESS) of no less than 1 GW/4 GWh by 2030.

Battery energy storage warehouses bridge the gap between renewable generation and reliable power supply. Whether you're a solar developer or factory owner, understanding these systems is crucial ...

These startups develop new energy storage technologies such as advanced lithium-ion batteries, gravity storage, compressed air energy storage (CAES), hydrogen storage, etc

Led by a massive \$1.5 billion facility for Aypa Power, a series of new deals for Jupiter Power and PowerBank show that lenders are doubling down on battery energy storage system assets.

Tesla's energy storage plant in Shanghai's Lin-gang Special Area commenced operation on Tuesday, as the assembly line started the production of the first Megapack unit. The Megapack, ...

Tesla is all set to complete the construction of its new state-of-the-art megafactory in Shanghai by the end of 2024. Dedicated to producing Megapack energy storage batteries, this facility ...

Discover 10 new battery storage companies to watch in 2026 & find out how their solutions will impact your business!
