

Renewable energy sources like solar and wind currently waste 15-20% of generated power due to mismatched supply-demand cycles [1]. The Nicosia Energy Storage Project (NESP), operational ...

Recently, there has been a lot of activity in energy projects mainly concerning the Eastern Mediterranean, especially regarding the Great Sea Interconnector (GSI) - an undersea cable that ...

Solar power systems can operate independently on islands, reducing dependence on external energy sources and enhancing energy self-sufficiency. This self-reliance is particularly ...

That's where energy storage capacity leasing swoops in as the city's new superhero. By 2025, the global energy storage market hit \$33 billion annually [1], and Nicosia's businesses are now ...

The 11th Cyprus Energy Symposium, held on Tuesday, October 31, 2023, at the Royal Hall in Nicosia, attracted wide interest from professionals and experts in the energy sector as well as ...

Frederick University's H2Zero Research Unit has developed a novel modeling on "hydrogen autonomous homes", showing how future houses could run entirely off-grid using ...

Excitement is building as drilling in Block 5 of Cyprus' exclusive economic zone (EEZ) officially began on Friday. President Nikos Christodoulides announced the development with ...

Republic of Cyprus President Nicos Anastasiades stressed on Monday the important steps that have been taken in the last two years within the framework of the government's strategic ...

The project is a testing ground for how to scale up grid-connected renewable energy on the island. We partnered with FOSS Research Centre for Sustainable Energy from the University of Cyprus and ...

A recent Gartner report highlights Nicosia's modular design philosophy as a game-changer. Each 2 MW storage block operates independently, allowing phased capacity upgrades without system downtime.
