

Delta ® Solar Electronic Faucets and Flush Valves feature top-mounted solar energy modules that harness ambient light energy to assist the batteries in operation of the unit.

But when my neighbor Dave showed me his new photovoltaic-panel-equipped kitchen faucet last week, I nearly spit out my matcha latte. Could this be a genius sustainability move or just another ...

Optima EAF-275 Solar-Powered Deck-Mounted Mid Body Bathroom Faucet with Integrated Side Mixer (Polished Chrome) Features: Double Infrared Sensors with Automatic Setting Feature Automatic Self ...

A solar powered pressurized water system is a fully off-grid solution that uses solar energy to pump and pressurize water, delivering it directly to your faucets, showerheads, irrigation ...

The pump is powered by a small solar panel which allows up to 15 psi of water to flow through the faucet and into a collapsible sink. With a water source nearby, such as a creek or lake, ...

The modular design incorporates all of the operating components of the faucet, including the sensor, solenoid, circuitry and solar energy module above the sink within a die-cast metal spout.

SOLAR POWERED SENSOR ACTIVATED ELECTRONIC HAND WASHING FAUCET FOR PRE-TEMPERED OR HOT AND COLD WATER OPERATION. THE FIRST SOLAR POWERED ...

A solar-powered faucet is a water fixture that uses energy from solar panels--usually compact photovoltaic cells built into the faucet or installed nearby--to power its electronic components.

Sloan mid-height above-deck access solar commercial restroom faucet. All maintenance can be done above the sink deck, great for high traffic applications.

The Sloan Solis faucets work with ambient light, much similar to solar-powered calculators. Light from any source is converted into electrical energy, which then turns on the faucet.
