

Does solartyle offer CAD drawings?

Solartyle is committed to supporting every stage of the project, from initial design through to final installation. Our CAD drawings are one of many resources available to ensure a smooth experience when working with our integrated solar tile system and FP McCann roofing accessories.

What is included in a solartyle drawings?

The drawings include key dimensions, installation sequences and compatibility notes to underpin accurate planning. Solartyle is committed to supporting every stage of the project, from initial design through to final installation.

Where should PV modules be installed?

The Modules should be installed in a location where there's no shading throughout the year. Ensure there's no obstacle to block light near the installation site. Lightning protection is recommended for PV systems that are to be installed in locations with high probability of lightning strikes.

How much space do photovoltaic modules occupy?

Photovoltaic modules installed on the ground or on a flat surface occupy, avoiding shading between the rows of modules, an area of approximately 20 m<sup>2</sup>/kWp. The design of a photovoltaic system, from the public utility grid to the photovoltaic modules, requires careful planning and compliance with local regulations.

Technical drawings showing installation of integrated solar PV and solar thermal panels in slate and tile roofs and solar thermal plumbing systems
