

Used for edge trimming of laminated PV modules to remove ...

Our portfolio includes not only automatic solar panel production lines, but also individual equipment for PV modules production, from glass loading equipment at the beginning to solar panel assembly and testing ...

Edobo Company specializes in producing solar panel production lines. With 15 years of research and development experience, we have developed advanced technologies and processes to ensure that our ...

Used for edge trimming of laminated PV modules to remove excess encapsulation film, glass burrs, or backsheet overflow, ensuring clean edges and precise dimensions.

Our main eva backboard cutter, silicon wafer laser cutting and mobile display cutting machine products are solar panel making machines, and used solar panel marking machines.

Our automated Solar/PV modules production line includes a complete set of equipment, such as solar cells laser cutting, string soldering, welding, glass loading, layup, laminating, framing, J-Box soldering, curing, ...

The whole machine is equipped with a safety fence, which has the safety protection function; Automatic control of the equipment, and the operation process does not require personnel intervention;

Discover efficient Trimming & Framing Machines for Solar Panels to optimize your production line. Precision, speed, and reliability for every module frame.

Explore the critical role of solar taping and trimming machines in PV module production. Learn how this equipment works and how to choose the right model.

Need an automatic trimming solution? Discover how the ECOTRIM A can automatically trim excess material from the edges of solar panels post-lamination.

Horad New Energy is a renowned Chinese manufacturer and supplier of top-quality Auto Trimming products. Our state-of-the-art factory, backed by advanced technology, ensures exceptional manufacturing standards.
