

Photovoltaic support installation in South China

Topfence specializes in the development, design, and construction of solar photovoltaic ground power stations, distributed photovoltaic, micro-grid

China's solar power sector is bracing for a sharp slowdown in new installations in 2026 after a major policy overhaul last year altered how renewable energy projects are paid, threatening to ...

The usage of forced labor in China has only been partially condemned globally, in part due to the fact that many countries depend on China's cheap labor and photovoltaic cells to afford the transition ...

To meet China's goal of carbon neutrality by 2060, substantial investment in upgrading power systems needs to be made to optimize the deployment of new photovoltaic and wind power ...

(Yicai) Feb. 6 -- China's solar power installations may tumble this year, as the industry adapts to last year's new policies aimed at regulating the sector and introducing more market-based ...

For the purposes of this report, PV installations are included in the 2024 statistics if the PV modules were installed and connected to the grid between 1 January and 31 December 2024, although ...

By comparing the spatial and temporal evolution, geographical characteristics, and low-carbon reduction of photovoltaic power installation in China's provinces and regions, ...

Second, PV businesses should give priority to developing the regions including Northern China, Southern China, and East China, which have relative advantage in terms of electricity prices ...

So there is a lot of uncertainty in the Chinese solar industry, but there are also irrefutable facts: China needs to continue to expand domestic solar capacity to reach its climate target....
