

Galp has kicked off construction on five new battery energy storage system (BESS) projects in Spain and Portugal, marking a major step in its clean energy strategy. According to the company, the ...

Lisbon - December 17, 2025 - Hyperion Renewables has begun construction of its first battery energy storage system (BESS) projects in Portugal, marking a milestone for the country's grid modernization and renewable ...

Installed in the southern Portuguese region of the Algarve, the 5MW/20MWh battery system enhances the site's ability to dispatch renewable energy to the grid when it needs it most and optimizes grid ...

StorSystems is driving the Portuguese energy transition by developing, building, and operating advanced battery storage systems. Battery storage allows power produced now to be stored for use later. It will be essential ...

As Portugal accelerates its renewable energy transition, Porto emerges as a hub for advanced energy storage solutions. Lithium-ion batteries paired with robust Battery Management Systems (BMS) are revolutionizing ...

The Portuguese government plans to invest up to 400 million euros (\$466 million) to improve grid management and boost battery storage following a massive blackout across Spain and Portugal in...

Portugal's battery storage boom steadies prices, slashes blackouts and opens tech roles. Discover how new policies could reshape your power bill.

The renewable energy landscape in Portugal is moving into a new phase, marked by stronger commitments from international investors and the integration of storage technologies into large-scale solar ...

Hyperion's first battery storage projects in Portugal, located in Estremoz and Évora. Co-located with solar PV plants, enabling energy to be stored during peak production hours.

Two hybrid projects with more than 630 MWh of battery storage planned in Portugal Lightsource bp is planning an 867 MWp solar and 300 MWh battery energy storage system (BESS) project and ...
