

Power generation of Fengtan Hydropower Station

Nestled in Yuanling County, Hunan Province, the Fengtan Hydropower Station stands as a marvel of Chinese hydroengineering. Since its first generator roared to life in 1978, this concrete hollow gravity ...

To access additional data, including an interactive map of global hydroelectric power plants, a downloadable dataset, and summary data, please visit the Global Hydropower Tracker on the Global ...

When will Baihetan hydropower station be completed? is still under construction, expected to be completed in 2022. Longyangxia Hydropower Station is the first large-scale cascade power station on ...

The designed total installed capacity is 400000 kW, and the annual power generation is 2.043 billion kWh. The total storage capacity is 17.4 cubic meters, belonging to seasonal regulation reservoir.

Fengtan (Fengtan Old Units) consists of 2 units of Francis turbines with 100MW nameplate capacity. The Fengtan (Fengtan Extension) has 2 electric generators installed at the site.

Data and information about power plants and their location across the globe. All plotted on an Interactive world map

Ertan Hydropower Station is China's largest power station built and commissioned in the twentieth century. The construction began in September 1991 and ended in 2000, and the first generating unit ...

The Fengtan Dam is an arch-gravity dam on the You River, located 48 km (30 mi) southeast of Zhangjiajie in Hunan Province, China. The purpose of the multi-purpose dam is flood control, irrigation, power generation and navigation. The dam has a power station with an installed capacity of 800 MW and provides water for the irrigation of 44 km (17 sq mi). Construction on the dam began in 1970 and the first generator was o...
