

Can solar panels be used in a prison?

They can be connected to multiple green power sources, but their power must first flow through a Transformer before it can be used within a prison. Solar panels are the least efficient form of energy source, however they are the only ones available at the start of the game.

How long do solar panels last in a prison?

That means a set of solar panels will pay for itself after 46 days (23 days if the grant was completed). A maximum of 128 green energy sources (solar panels, Solar Wind Hybrids or Wind Turbines) can be placed in a single prison. Community content is available under CC-BY-SA unless otherwise noted.

What is Prison Architect going green?

Prison Architect: Going Green offers new means of making an environmentally-friendly prison. Players can farm the land, construct green energy sources, and customize their compound with sustainable materials. Crafty Inmates will seize the opportunity and produce thematic contraband, increasing the challenge to keeping a prison under control.

How many green energy sources can be placed in a prison?

A maximum of 128 green energy sources (solar wind hybrids, Solar Panels or Wind Turbines) can be placed in a single prison. If Weather is on (Legacy, Low, Medium, High), Solar Wind Hybrid may receive a buff, neutral, good (+66.6% or +133.2% with Goal 7) or bad (-66.6% or to -33.3% with Goal 7) weather.

A solar wind hybrid is an electricity generator that harnesses both the power of wind and the sun. They can be connected to multiple green power power sources, but their power must first ...
