

Resort using Manila solar outdoor unit grid-connected type

We offer a diverse menu of products and services--ranging from grid and off-grid solar panels to solar generators--that are most cost-effective and which provide the highest environment benefits.

Learn the essential differences between on-grid, off-grid, and hybrid solar setups to find the best system for your needs in the Philippines.

This solution is intended for areas without a stable grid connection, constant power interruption and outages, or living in remote areas without electricity or unreliable power source.

Enrolling in NM ensures that your RE facility is safely connected to the grid through a bi-directional meter that measures both your import and export energy and ensures you are billed accurately. The RE ...

Our customer chose Anern Solar off-grid type solar power system to power his resort. They get the power a full day without any stop. The system is running still well till now.

Our off-grid and hybrid solutions bring electricity to areas where a functional grid is not always available, and can help to overcome frequent power interruptions.

We have speciality across grid-connected solutions, hybrid solutions with batteries, and also off-grid solutions for locations that experience poorly served electricity services.

See how SNAT Solar empowered a Philippines island resort with a 12kW solar system and 30kWh battery storage. A perfect off grid energy solution for remote locations. Explore our project gallery.

We designed a comprehensive 100kW off-grid solar system with 400kWh of battery storage, sized to handle the resort's peak loads and provide multi-day autonomy during cloudy weather.

Solar-powered beach resorts across the Philippines are setting new standards, proving luxury hospitality can actively benefit the environment. Guests can now work and relax amidst ...
