

Santo Domingo builds wind and solar complementary solar container communication stations

Summary: Explore how the Santo Domingo Wind Power System is transforming renewable energy adoption in the Caribbean. Learn about its innovative design, environmental impact, and economic ...

The solicitation specifically seeks to contract new wind and solar photovoltaic generation bundled with storage systems, with project capacities ranging from 20 MW to 300 MW, to reach the ...

Santo Domingo-made containers reduce logistics costs by 22% compared to imports. Plus, they're tailored for tropical conditions - think built-in humidity control and hurricane-rated anchoring systems.

By tackling these barriers, the project seeks to enhance the overall understanding and implementation of renewable energy technologies, promote innovative business models, and ultimately support the ...

Ambos estarán ubicados en el municipio San Antonio de Guerra, provincia Santo Domingo. El director de la CNE, Edward Veras, destacó que estos proyectos son un hito importante en el avance hacia ...

Recently, the Washington Capital Solar Park 2 and 3 were officially inaugurated, which together add up to 140 MWp (67 MWp and 73 MWp) and will be located in the municipality of San Antonio de Guerra ...

The Superintendency of Electricity (SIE) has approved Resolution SIE-092-2025-LCE, establishing the technical and regulatory basis for a tender for up to 600 MW of new solar and wind ...

The tender offers competitive conditions for solar and wind developers. Long-term power purchase agreements (PPAs) backed by the distribution companies enable stable revenue ...

The Dominican Republic has launched a tender for up to 600 MW of solar and wind capacity, requiring projects to include at least four hours of battery storage to support stability in the...

As a leader in renewable integration, EK SOLAR provided modular battery solutions for the Santo Domingo project. Their containerized systems enable rapid deployment while meeting strict safety ...
