

The King Abdullah Initiative for Solar Water Desalination was launched in 2010 with the aim of integrating renewable-energy technologies into national desalination processes. [4][5] The Al-Khafji ...

The Solar-Powered Seawater Desalination Project in the Kingdom of Saudi Arabia is an initiative aimed at desalinating water and addressing the challenge of water scarcity by leveraging ...

The evidence compiled over the first operating cycle demonstrates that solar-driven desalination, when coupled to MAR, offers Saudi Arabia a credible, financeable and climate ...

Abundant solar energy: Saudi Arabia has one of the highest solar radiation levels in the world, making solar energy a highly viable and sustainable source for desalination.

Welcome to AlKhafji Desalination Plant, the world's largest solar-powered water desalination project that meets the region's water needs in an innovative, sustainable way.

ACWA Power launches a solar-powered desalination plant in Saudi Arabia, supporting sustainable water management and Vision 2030 goals.

OverviewDevelopmentTechnologyCapacity and operationEnvironmental impactThe Al-Khafji Solar Desalination Plant is a seawater reverse-osmosis (SWRO) facility located near Al-Khafji in the Eastern Province of Saudi Arabia. It is described in governmental and technical publications as one of the earliest large-scale desalination plants intended to operate primarily using solar photovoltaic (PV) power. The project was developed under the King Abdullah Initiative for Solar Water Desalination, led by the King Abdulaziz City for Science and Technology (KACST).

Al-Khafji Desalination Plant, located in the Kingdom's Eastern Province, is the world's largest solar-powered water desalination project, providing the region's water requirements through...

In the arid northeast of Saudi Arabia, the city of Al Khafji is home to an extraordinary innovation--the world's first large-scale solar-powered seawater reverse osmosis (RO) desalination ...

To address these challenges, ATESS has developed a solar-powered energy storage solution to enhance the sustainability of desalination processes. Desalination is crucial for Saudi ...

The plant uses solar panels to help Saudi Arabia reduce its carbon emissions and transition towards clean, sustainable energy. Learn more about how Vision 2030 is actively protecting our most vital ...
