

Discover the top solar energy data for 2026. Find reliable and up-to-date solar energy datasets and databases, including solar farm and solar power datasets. Explore on Datarade.ai for the best providers.

The database combines datasets from the U.S. EIA, the Environmental Protection Agency (EPA) and the National Renewable Energy Laboratory (NREL). The locations and array boundaries of all ...

The Global Solar Atlas provides a summary of solar power potential and solar resources globally. It is provided by the World Bank Group as a free service to governments, developers and the general ...

The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well as country-aggregated distributed (<1 ...

Click here to go to the U.S. Large-Scale Solar Photovoltaic Database website and online viewer, where the USPVDB data can be downloaded. This site holds the codebooks, memos and other information ...

Here, we present a database which collates historical, current, and future cost and performance data and assumptions for solar power generation from the open literature. Solar energy ...

The U.S. Solar Photovoltaic Database (USPVDB) provides the locations and array boundaries of U.S. front-of-the-meter, photovoltaic facilities, direct current capacity of 1 megawatt or more, that became ...

Open ReMap collects several databases of renewable energies including wind turbines, solar panels, bioenergy and hydroelectricity facilities. Each of these sources can be explored individually to view ...

Data and Tools NLR collects data sets and develop tools to aid in the analysis and adoption of solar energy. Also, see the list of all NLR's solar data and tools. Annual Technology Baseline Provides a ...

Solar energy in the United States is booming. Along with our partners at Wood Mackenzie Power & Renewables, SEIA tracks trends and trajectories in the solar industry that demonstrate the diverse ...
