

But what exactly is solar reflective glass, and when should you consider using it? Let's dive into its features and benefits, and explore the ideal applications for this innovative glass.

Reflective glass is another type of solar control glass that is commonly used in buildings. It has a reflective coating on one side of the glass that reflects the sun's radiant heat energy away ...

REFLECTASOL® is a reflective, solar control glass, carefully designed to meet two requirements of architects: heat resistance on the inside and great exterior appearance, for better living and better ...

Reflective glass is a type of architectural glazing designed to reflect a significant portion of solar radiation before it enters the building. It achieves this through a thin metallic or metal oxide coating applied to ...

Solar control glass is ideal for helping to maximize natural daylight while reflecting a high proportion of solar radiation away from the glass, contributing to keeping the indoor space bright but cool.

Solarban® R67 glass (formerly Solarban® R67 glass) combines excellent solar performance with a soft, neutral coating that provides a crisp, clean and brilliantly clear exterior appearance.

In hot conditions or for building with high internal loads, solar control glass is used to minimize solar heat gain. It allows sunlight to pass through a window while radiating and reflecting away a large amount ...

The scope of this Glass Technical Paper is to provide education on design considerations to reduce the possible effects of the reflective characteristics of exterior cladding materials and glazing systems ...

Solar Reflective Glass: is specifically designed to provide excellent solar control by reflecting a significant amount of solar heat and light. It helps in reducing heat gain and glare while allowing ...

Solarcool® glasses can be glazed with the reflective coating positioned on either the first or second surface. The glass has improved performance and higher exterior visible-reflectivity with a metallic ...
