

XG-6100 MI silicone potting compound, with its soft gel and good thermal conductivity and waterproof performance, is aimed at micro inverters as the key solar photovoltaic components ...

Epic Resins offers a complete range of bonding, potting and encapsulating products for solar energy applications. Epic Resins products are designed for optimal thermal management critical in solar ...

The current mainstream silicone rubber potting adhesives can withstand a temperature range of -60° to 150° and have passed the UL94 V-0 flame retardant certification, providing ...

Potting compounds, encapsulating materials, and solar panel bonding adhesives for renewable energy batteries, jboxes, charge controllers, and micro inverter systems.

silicone potting compound is a two-component, room temperature curing, condensation dealcohol type silicone potting material. Self-leveling, high and low temperature resistance, excellent aging ...

Organic silicon potting adhesive has very stable usability and is not affected by UV, high temperature, humidity, or ozone even in harsh environments.

Guangdong Huachuang Electronic Materials Co., Ltd., a professional adhesive and new material research and development and production enterprise located in Guangdong Province, ...

The potting materials formulated at Epic Resins have a wide range of characteristics to address the specific needs of solar power electronics. In addition to our polyurethane and epoxy potting ...

We carry out developments individually for your specific requirements he photovoltaic (PV) industry. In photovoltaic and solar thermal applications, once installed many components and modules have to ...

HN-6607A/B Two-Component Potting Silicone Gel is a very soft, low cross-linking density addition potting silicone gel. It is a low viscosity liquid before vulcanization.
