

Solar support profiles with complete specifications

Our best-selling PV mounting profiles and accessories offer versatile, high-quality solutions for securing solar panels on rooftops.

A complete range of brackets, structures, and accessories for the realization of all support options for photovoltaic and solar thermal panels. From tiled and barrel roofs to all types of industrial coverings.

Structures and support profiles for photovoltaic module. 2 | Circutor.

Sika manufactures custom solar panel profiles, ideal for building support structures for solar panels. Our solutions include steel profiles, specialized system profiles, and rails, all tailor-made to ensure ...

Weight-optimized supporting profiles without expansion joints, large spans even for high loads, lower cost design, production and assembly, weather-resistant material or a combination of all ...

The support structures are the elements that allow the fixing of the modules on the roofs where the photovoltaic installation must be housed, constituting a main element of the solution. Circutor offers a ...

Our profiles are available in a variety of shapes, sizes and finishes to perfectly match the unique specifications of your solar panel installation.

Thanks to our years of experience and R& D studies, we assist our customers choose the appropriate profile for the high-loads and environmental conditions that solar panel structures are exposed to and ...

Our custom steel profiles are proven in the utility scale photovoltaic industry as well as in solar thermal power plants; used as support or frame profiles, posts, rafters, module carriers and much more.

Our roll form machinery can do solar panel support profiles, U Profile, C Profile and additionally support profiles for PVC windows and doors. Also we produce gypsum board profiles.
