

We design our solar systems for Solomon Island's hot temperatures and remote, rural conditions. We only use lithium batteries; and we stick to quality components from manufacturers like Deye and Victron Energy.

To learn more about the technology and processes behind solar energy projects, from large-scale plants to residential systems, explore our comprehensive free e-course.

Who is the largest photovoltaic panel manufacturer in the Solomon Islands? While multiple companies operate in the region, EK SOLAR leads in both market share and innovative solar solutions tailored for tropical island ...

Explore the solar photovoltaic (PV) potential across 2 locations in Solomon Islands, from Noro to Honiara. We have utilized empirical solar and meteorological data obtained from NASA's POWER API to determine solar ...

Solomon Power also supports the installation of small scale grid connected micro embedded generators that convert renewable energy into electricity that can be used in your home or business premises. Sources of ...

The solar and battery system at Buala Market will support clean, renewable power to essential services event during extended periods of rain. Australia's High Commissioner to Solomon Islands, Jeff ...

Recently, a non-profit organization that focuses on providing sustainable energy solutions in developing countries has taken an interest in this village. They have conducted a feasibility study and found that installing a solar ...

Sunpower's mission is to power the lives of underserved customers by designing and distributing a line of affordable solar home energy solutions for households and businesses that are completely off, or ...

"Solomon Islands currently has one of the lowest levels of access to electricity in the region, with over 85% of the population of Solomon Islands still without access to electricity and for this project alone, we received ...

Electricity from the solar panels is converted (via an inverter) into AC power that is suitable for operating domestic appliances. Whenever the system produces more power than is being used, the surplus is fed ...
