

A detailed breakdown of your PV system losses is provided on the PV system losses page. For better data analysis, the page is further categorized into yearly and monthly losses, respectively.

Because both loss rates are relative to year 1 and the initial AC capacity is less than the initial DC capacity, the AC loss rate levels are slightly below the DC loss rate.

In order to deliver accurate production estimates, it is crucial to understand what factors reduce the standard energy yield of your PV plant and by how much. In this article, we explore losses from module's faces (back ...
