

This dual-purpose system combines solar energy production with agricultural land use, allowing crops and solar panels to coexist on the same property. Vatican City joins Albania, Bhutan, ...

Vatican City's solar panels provide a significant portion of the energy needed for key buildings like the Paul VI Audience Hall, demonstrating a strong commitment to transitioning to renewable energy.

Italy has agreed to a Vatican plan to turn a 430-hectare (1,000-acre) plot of land north of Rome into a vast solar farm that will generate enough electricity to meet the needs of Vatican...

"Humanity has the technological means necessary to face this environmental transformation." This initiative will make Vatican City, the smallest country by land mass, entirely ...

The world's smallest country just made a big move: Vatican City is now powered entirely by solar energy, setting an example for global climate action.

Italy has approved a Vatican initiative to transform a 4.3-square-kilometre field north of Rome into a large-scale solar farm, marking a key step in the Holy See's ambition to make Vatican ...

Vatican City has joined Albania, Bhutan, Nepal, Paraguay, Iceland, Ethiopia and the Democratic Republic of Congo to become one of just eight countries in the world to generate 100% ...

Italy agreed Thursday to a Vatican plan to convert a 430-hectare (1,000-acre) field at Santa Maria Galeria--about 35 kilometers (20 miles) north of Rome--into a large solar farm intended ...

This ambitious project, which has received approval from the Italian government, aims to generate sufficient electricity to fulfill the energy needs of Vatican City, aligning with Pope Francis' ...

Pope Francis has ordered the construction of a solar power plant to supply the Vatican's electricity needs. He did so with the apostolic letter in the form of Motu proprio Fratello Sole,...
