

As global electricity demand grows 3% annually (IEA 2023), Victoria's manufacturers are answering the call with cutting-edge storage solutions that act like a "giant battery for the grid". From solar farms to ...

We design, engineer, and manufacture our energy storage solutions right here in Melbourne, ensuring the highest possible quality for our customers. Our range of products are easy to use, scalable, and ...

The FranklinWH System effectively avoids these pitfalls, ensuring homeowners maintain uninterrupted energy storage and utilization. It offers unparalleled reliability and operational simplicity ...

The Ballarat Energy Storage System provides back-up power and grid stabilisation, vital to maintaining a reliable and affordable energy supply in Western Victoria.

This document outlines the process of how to configure a Fronius inverter system to comply with the AEMO directive for the Victoria Emergency Backstop Mechanism for Solar.

Victoria's emergency backstop mechanism for solar is designed to ensure energy reliability as the state transitions to renewable energy, particularly solar power.

Learn about AEMO. AEMO's Draft 2026 ISP is a roadmap for the NEM's transition, and outlines an "optimal development path" (ODP) for generation, storage and network investments to meet ...

Victoria's Emergency Backstop Mechanism, introduced in stages starting October 2023, mandates that new, upgraded, and replacement rooftop solar systems be capable of remote modulation or ...

Australian Made Renewable Energy . Solar Power and Batteries . Off Grid and Mobile Power . Self-contained Energy Storage Systems (ESS) . EV Charging . Energy and Battery Monitoring . Cable ...

With a configuration separate from the preexisting PV inverter, the FranklinWH System avoids the need for any modifications of original setups and the need for any emergency backstop ...
