

Here's everything you need to know about getting a pair of certified solar eclipse glasses before March 29. Get the world's most fascinating discoveries delivered straight to your inbox.

Solar viewers (also known as solar viewing glasses or solar eclipse glasses) are special eyewear designed for direct viewing of the Sun. Standard sunglasses are unable to filter out eye-damaging radiation. Solar viewers can be used for safe viewing of solar events such as eclipses. The recommended optical density of this eyewear is 5, meaning that the solar viewing filter only permits 1 part in 100,000 of incident light to ...
