

# What to do if the photovoltaic panels installed on the roof leak

How do you fix a roof leak under solar panels?

To fix a roof leak, identify the source, repair the roof, inspect and upgrade the mounting system, and reinstall and seal the solar panels properly. Improper installation practices and pre-existing roof issues are the primary culprits behind roof leaks under solar panels. Let's delve into each cause: 1. Poor Installation Practices

Why does my roof leak after installing solar panels?

There are various reasons your roof could leak after installing solar panels. They mostly have to do with poor installation where mounting holes are not sealed properly, the top is incompatible with solar panels, or the roof is old and not designed for solar panels.

Can solar panels be repaired if a roof is leaking?

When installing solar, the mounting points are one of the leading causes of a leaking roof, and handling these repairs could mean temporarily removing the panels while the leak is addressed.

What should I do if my solar panel is leaking?

If you suspect that the leak is related to the solar panel installation, contact the installer immediately. Reputable installers will offer warranties or guarantees and should address the issue promptly. Provide them with details about the problem and any visible damage. 3.
